Telehealth Services:

care PLUS

National Coverage

- 50-state provider network allows you to launch nationwide
- Go to market quickly, avoid hiring medical directors, and skip over complex state laws—we handle it all for you

Qualified MDs

- Our provider network is comprised of MDs, many of whom are board-certified in obesity medicine and related specialties
- We offer custom provider matching to connect your patients with the right care.

Staffing

- Our network also includes individual contracts with telehealth “unicorns”—MDs licensed in 30+ states

Pharmacy Services:

care PLUS

National Coverage

- Nationwide pharmacy network allows you to serve patients in all 50 states
- Includes both 503A and 503B compounding pharmacies

FDA Compliance

- State-licensed, FDA-inspected compounding facilities
- Branded products (Ozempic®, Wegovy®, Mounjaro®, etc) available

Pharmacy Routing

- Algorithmic pharmacy routing means that your patients always get the fastest available fulfillment, for the lowest possible cost

Formulary

- Product categories include:
 - weight loss
 - skin care
 - hair loss
 - sexual health
 - general wellness

Patient Support Services:

care PLUS

U.S. Based Team

- Our U.S.-based support team is available to answer patient questions over email, by text, or on the phone
- Our team will coordinate with yours to offer the highest level of care

Live Support

- Weekdays: (SMS, email, phone):
9am - 5pm EST
- Weekend (SMS, email):
9am - 5pm EST

Bilingual Care

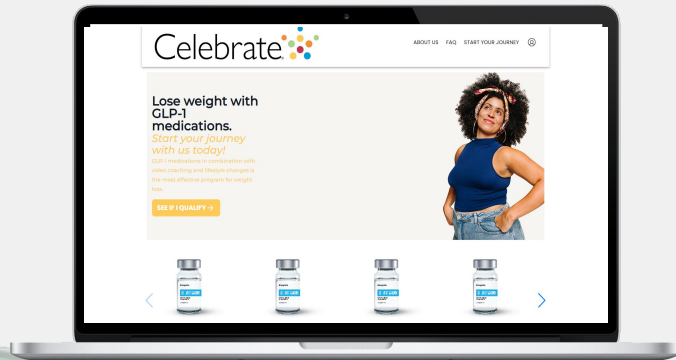

- Storefront websites, telehealth consults, and patient support all available in Spanish.

Nursing Team

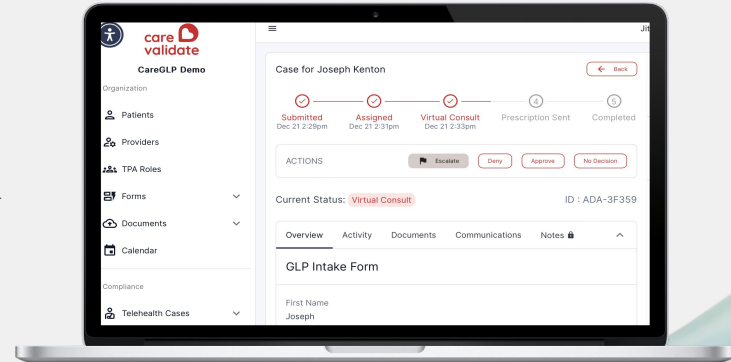

- Team of registered nurses available to monitor cases and answer clinical questions

Essential Medical Info:

care **PLUS**

1. GLP-1s are not new. They have been in use since 2005, primarily to treat type II diabetes.
2. In addition to diabetes and obesity, GLP-1s may benefit many obesity-related comorbidities, such as hypertension, sleep apnea, PCOS, arthritis, and other conditions.
3. GLP-1s are predicted to be the most-prescribed class of drugs in history.
4. GLP-1s are meant for long-term use. Average use is 6–12 months, but many patients will continue indefinitely.
5. In clinical trials, GLP-1 users lose 15–20% of their body weight over 12+ months.
6. Like other weight loss interventions, weight will be regained if the intervention is discontinued.

GLP-1 Evolution, 2005 - 2025

GLP-1s have been used since 2005 to treat type II diabetes, with weight loss as a major side effect.

Gen I: Exenatide (2005)
Brand Names: Byetta®
Half-life: 2.4 hours

Gen II: Liraglutide (2009)
Brand Names: Victoza®, Saxenda®
Half-life: 13 hours

Gen III: Semaglutide (2017)
Brand Names: Ozempic®, Wegovy®
Half-life: 7 days

Gen IV: Tirzepatide (2023)
Brand Names: Zepbound®, Mounjaro®
Half-life: 5 days

GLP-1 Effects:

care^{PLUS}
